SAYED SEPEHR MOZAFARI

Software Developer & QA Automation

Email: supher.22@gmail.com | GitHub: github.com/Sayedse | LinkedIn: linkedin.com/in/sayed-sepehr

PROFESSIONAL SUMMARY

Software Developer and QA Automation professional focused on building modern, reliable, and user-friendly digital experiences. Combines software development, web technologies, UI/UX principles, and automated testing to create products that are both functional and dependable.

PROFESSIONAL EXPERIENCE

DoorDash — QA Automation Engineer *January 2026 – Present*

- Created automated test scripts using Java and Selenium WebDriver for regression and functional testing.
- Performed API testing using REST Assured and Postman.
- Validated backend data using SQL queries and JDBC connections.
- Used TestNG and Maven for test execution and framework management.
- Worked with Jenkins pipelines for automated test runs.
- Participated in Agile sprint meetings and defect tracking using JIRA.
- Maintained reusable test components using Page Object Model (POM).

CVS — QA Engineer *September 2025 – December 2025*

- Assisted in developing UI automation scripts using Selenium WebDriver and Java.
- Executed smoke, regression, and functional testing for web applications.
- Created and executed API test scenarios using Postman.
- Performed database validation using SQL queries.
- Used Git and GitHub for version control and collaboration.
- Supported test execution using TestNG and Maven.
- Worked with developers to identify and report software defects.

TECHNICAL SKILLS & TESTING TOOLCHAINS

Automation Testing: Selenium WebDriver, Playwright, TestNG, JUnit, Cucumber
API Testing: REST Assured, Postman
Database: SQL, PostgreSQL, MySQL, Oracle, SQL Developer
CI/CD & Version Control: Jenkins, Git, GitHub
Development & Frameworks: Java, Maven
Testing Practices: Agile/Scrum, BDD, Page Object Model (POM)
Tools: IntelliJ IDEA, JIRA

EDUCATION

Associate Degree in Computer Science
Prince George’s Community College
